

PowerPoint Workshops

The Purdue University Writing Lab now offers instructors a selection of interactive PowerPoint presentations on a variety of writing-related topics. Each presentation is designed to provide instructors with information about the elements of writing while allowing them to initiate student participation and discussion, adjust their comments to the specifics of class projects, and progress through the program at their own desired pace. Each presentation also contains facilitator notes, designed to aid instructors through discussion of each topic, and references to supplemental handouts from OWL.

The workshops can be checked out on CD-ROM from the Writing Lab, along with a binder that contains loading directions and supplemental handouts from the Online Writing Lab (OWL). The workshops may also be downloaded directly from OWL at <http://owl.english.purdue.edu/workshops/pp/index.html>. In either case, your computer must be equipped with Microsoft PowerPoint for the programs to work. You may also invite a Writing Lab Instructor to present any of the following presentations to your class. For more information about our Traveling Tutorial Service, please call the Writing Lab at 494-3723.
