Summary

During the 1995-1996 academic year, the Purdue University Writing Lab had 13,219 requests from 6,186 users for a variety of services but had to turn away 615 student requests for tutorials.

Our OWL (Online Writing Lab) had a total of 1,440,755 requests (Web, Gopher/FTP, and e-mail). Of that number of OWL users, 42,845 requests on the Web site and 542 on the Gopher/FTP site were from Purdue users. The other requests came from 95 countries around the world, with users from high schools, government offices, other educational institutions, the general public, non-profit agencies, and military users in the U.S. and abroad.

Other noteworthy efforts in this year's work are the following:

• **Continued excellence in evaluations**
  We are pleased that during a busy year, our student evaluations continue to remain very high, with 94.3% of the students reporting the quality of instruction as very helpful.

• **Use of OWL to provide campus instruction in Internet use**
  In addition to instructors who made use of OWL materials for their classes and students who used OWL when writing papers, Writing Lab staff presented 26 workshops on OWL and the Internet in classrooms in various departments across campus.

• **University support for OWL**
  Funds from the Faculty Reinvestment Program, the School of Liberal Arts, and the English Department made possible two .25 TAs (one of whom served as the OWL Coordinator and the other as OWL Technical Coordinator) and provided a much-needed new OWL server and upgraded equipment. This resulted in improved instructional capabilities and facilitated more workshops on OWL, both in the Writing Lab and in classrooms or campus computer labs.

• **Off-campus recognition of OWL**
  OWL continued to serve as an ambassador for Purdue as the site was given numerous awards, including a four-star rating by the Excite Web search program; four stars by Netguide, a Web review site; a "Best of the Net" award by EZ Connect (and described as "one of the best and most useful sites on the Internet"); and four stars by Luckman Interactive (and included in their best CD-ROM). OWL is mentioned and pictured in various books and textbooks, including a textbook for college computer science classes and a high school textbook for college-bound students. A commercial company that sells educational Internet materials has licensed some of OWL's instructional materials on writing (and prominently displays a notice that Purdue University is the content provider) for a program purchased by hundreds of high schools throughout the U.S.

• **Professional development for the Writing Lab staff**
  Both graduate and undergraduate tutors read papers at national and regional conferences, and the OWL Coordinator completed a doctoral dissertation focusing on our OWL and uses of technology for writing instruction (for which he won a National Writing Centers Association scholarship). In addition, the Director had articles and book chapters
accepted for publication, read papers on writing center theory and administration at
national conferences, and was a keynote speaker at a national conference.

The Writing Lab continued to provide Purdue students with one-to-one tutorial assistance with
writing skills as well as a variety of other services detailed in Part I. Statistical reports of
this use are included as Part 2; and evaluation figures and comments from users of the Writing
Lab's services are included in Part 3.
